

# In which EU project are you working?

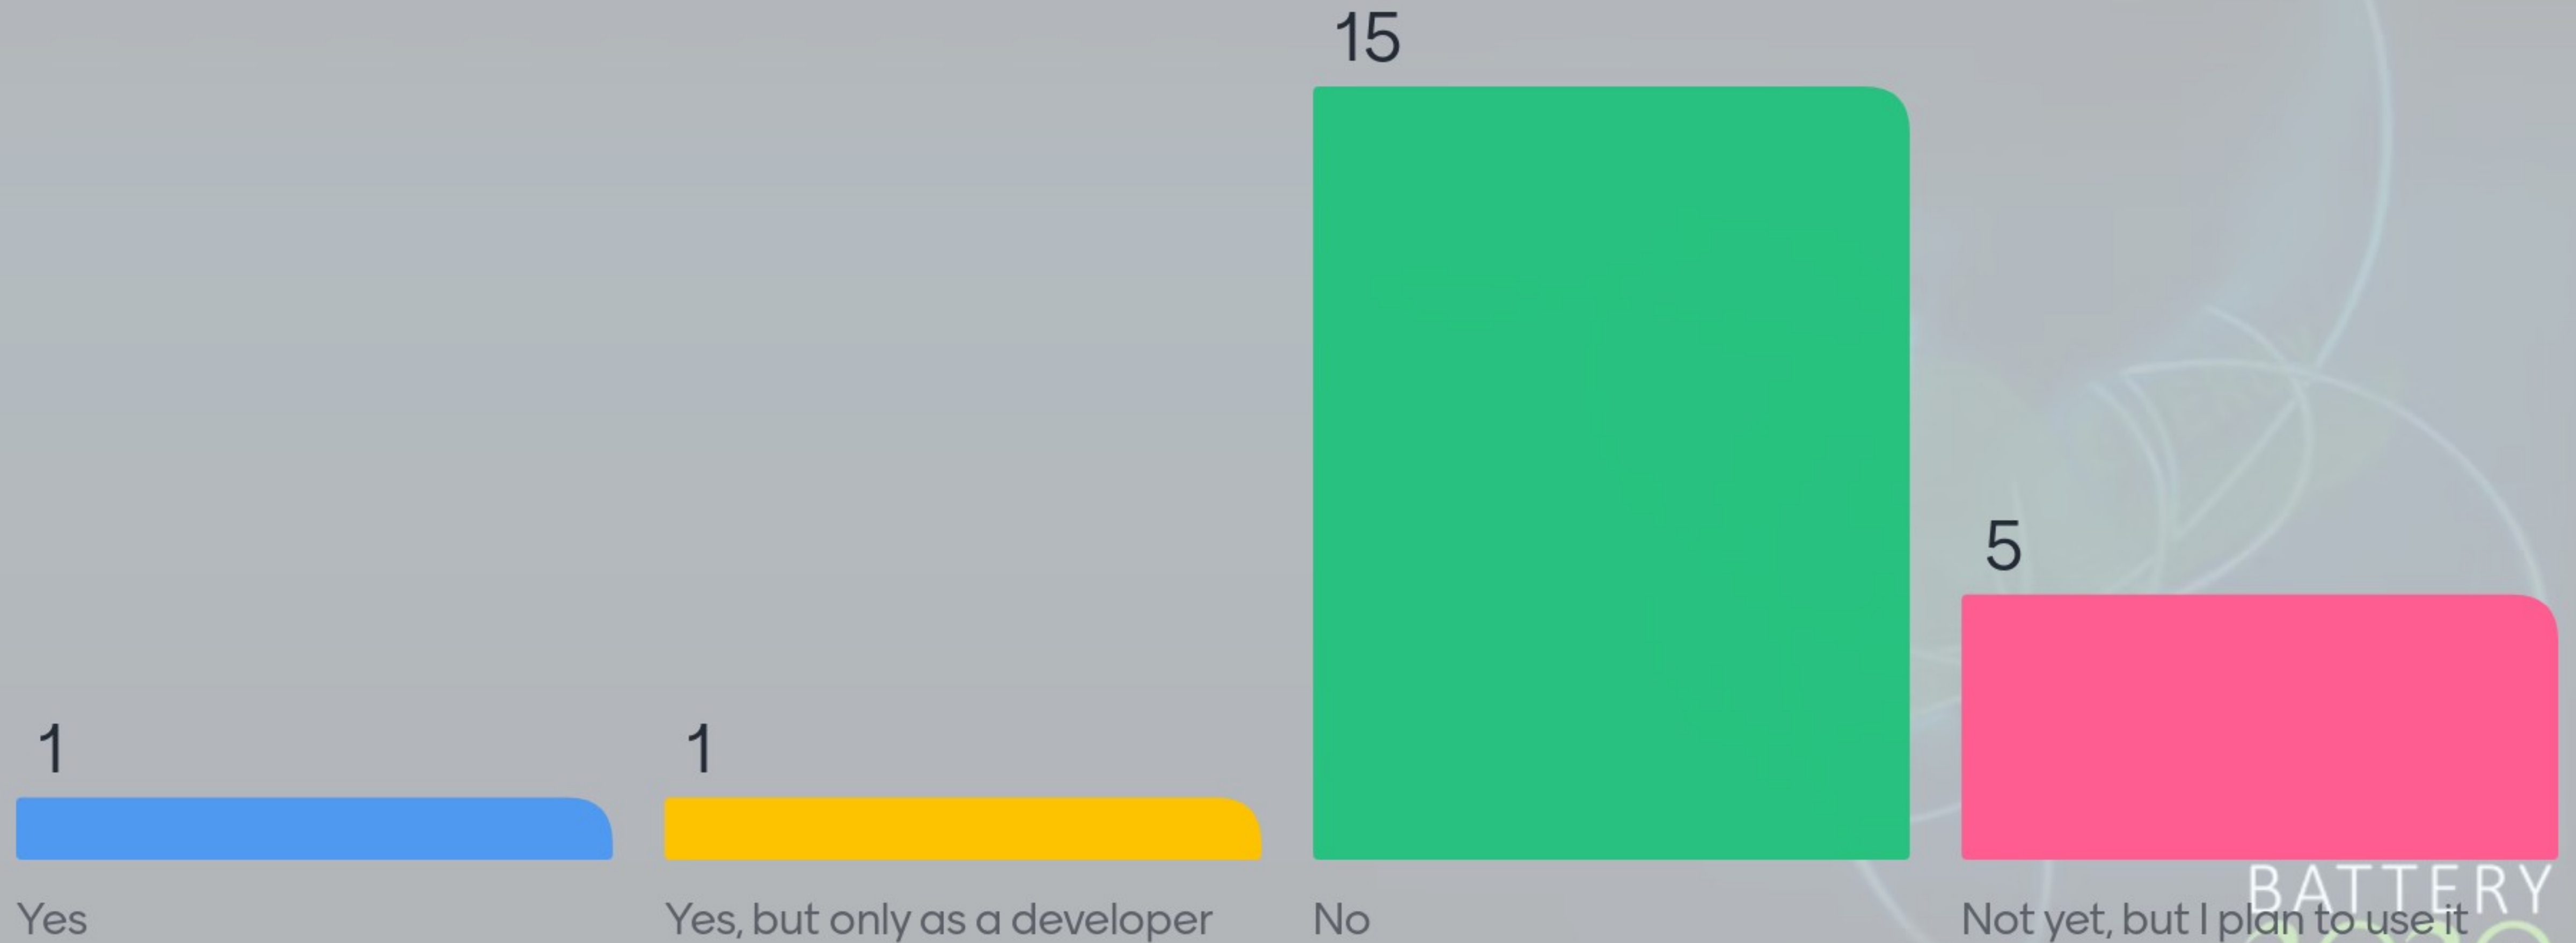

26 responses

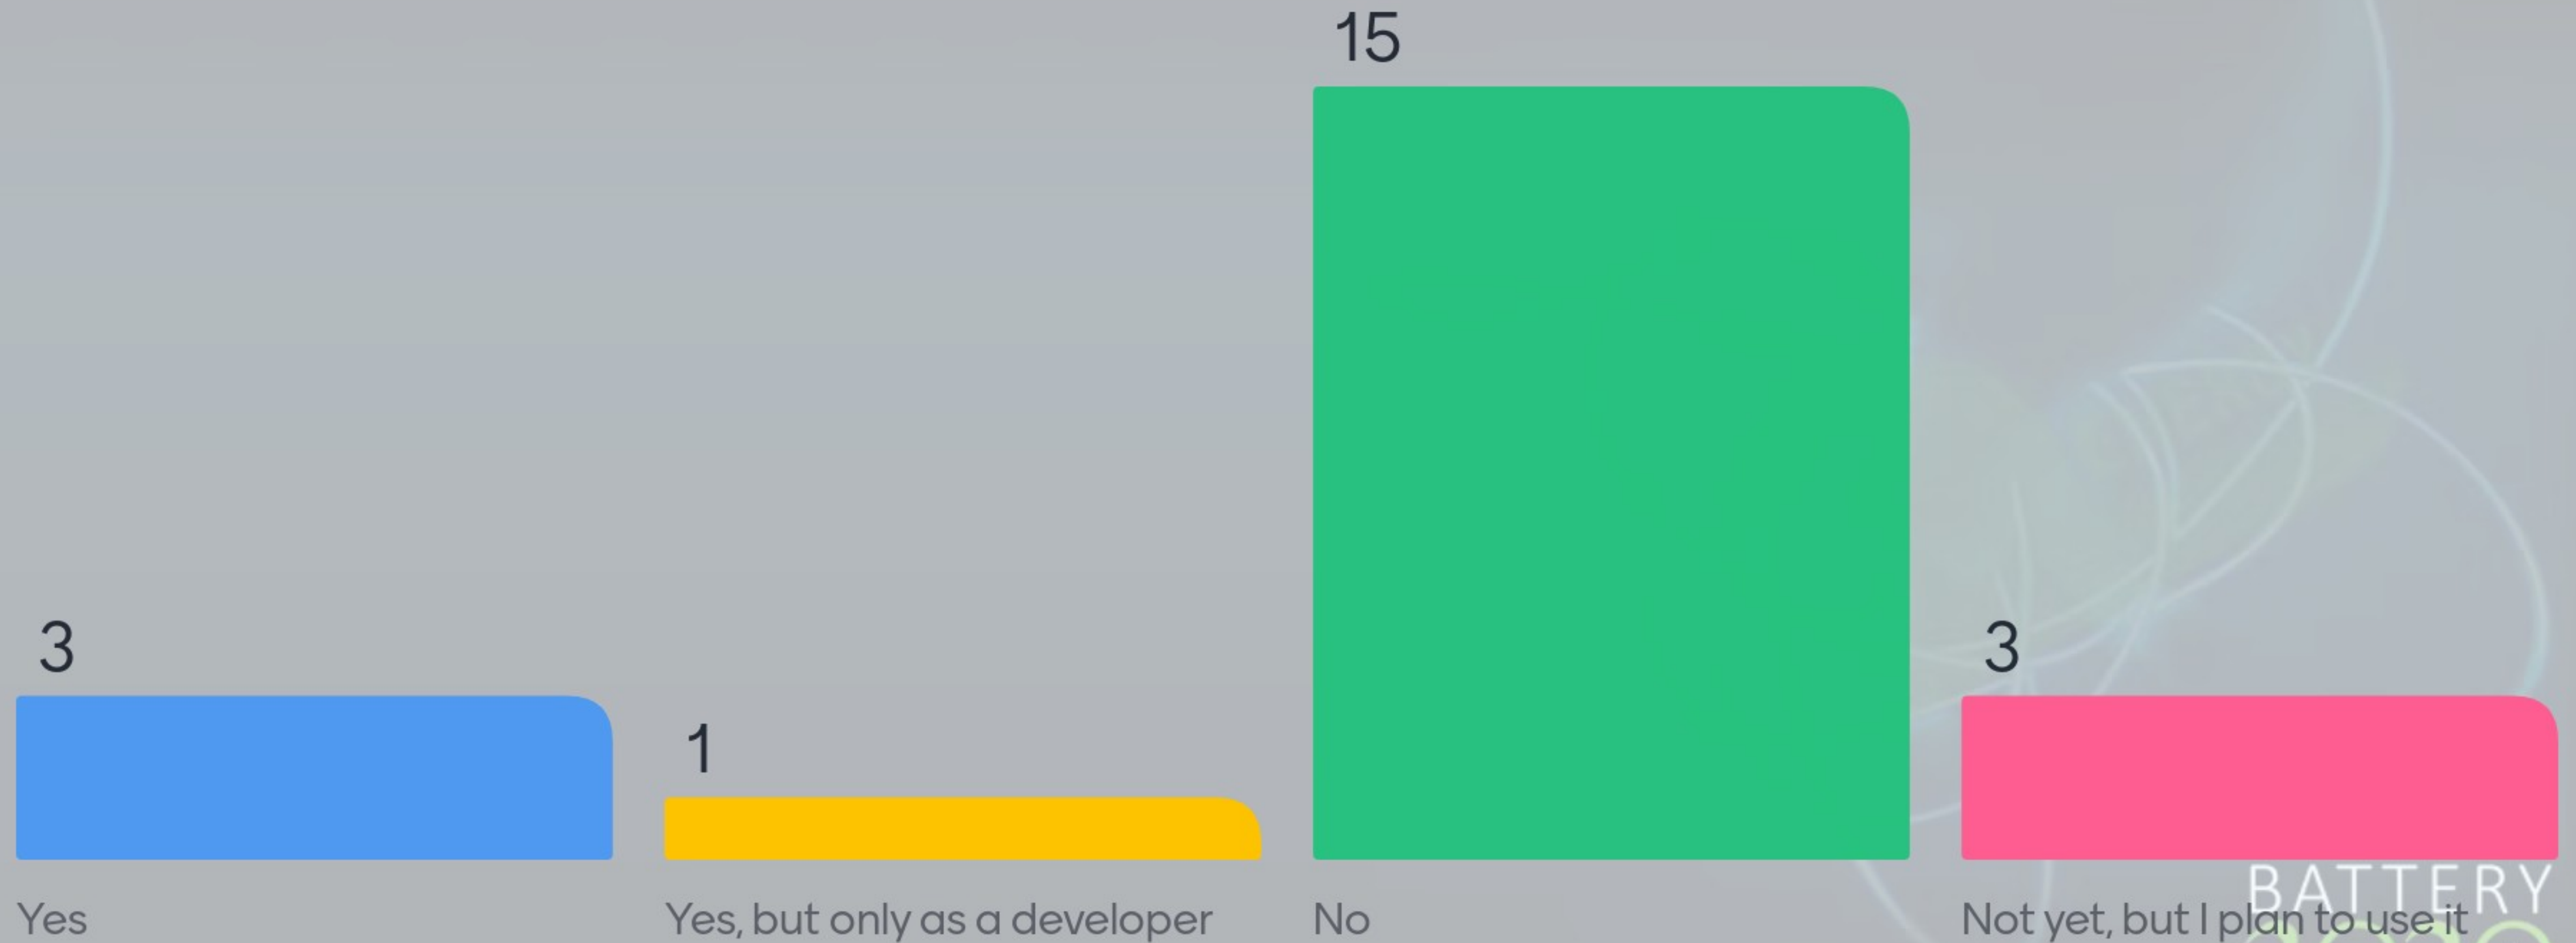

BATTERY  
2030+

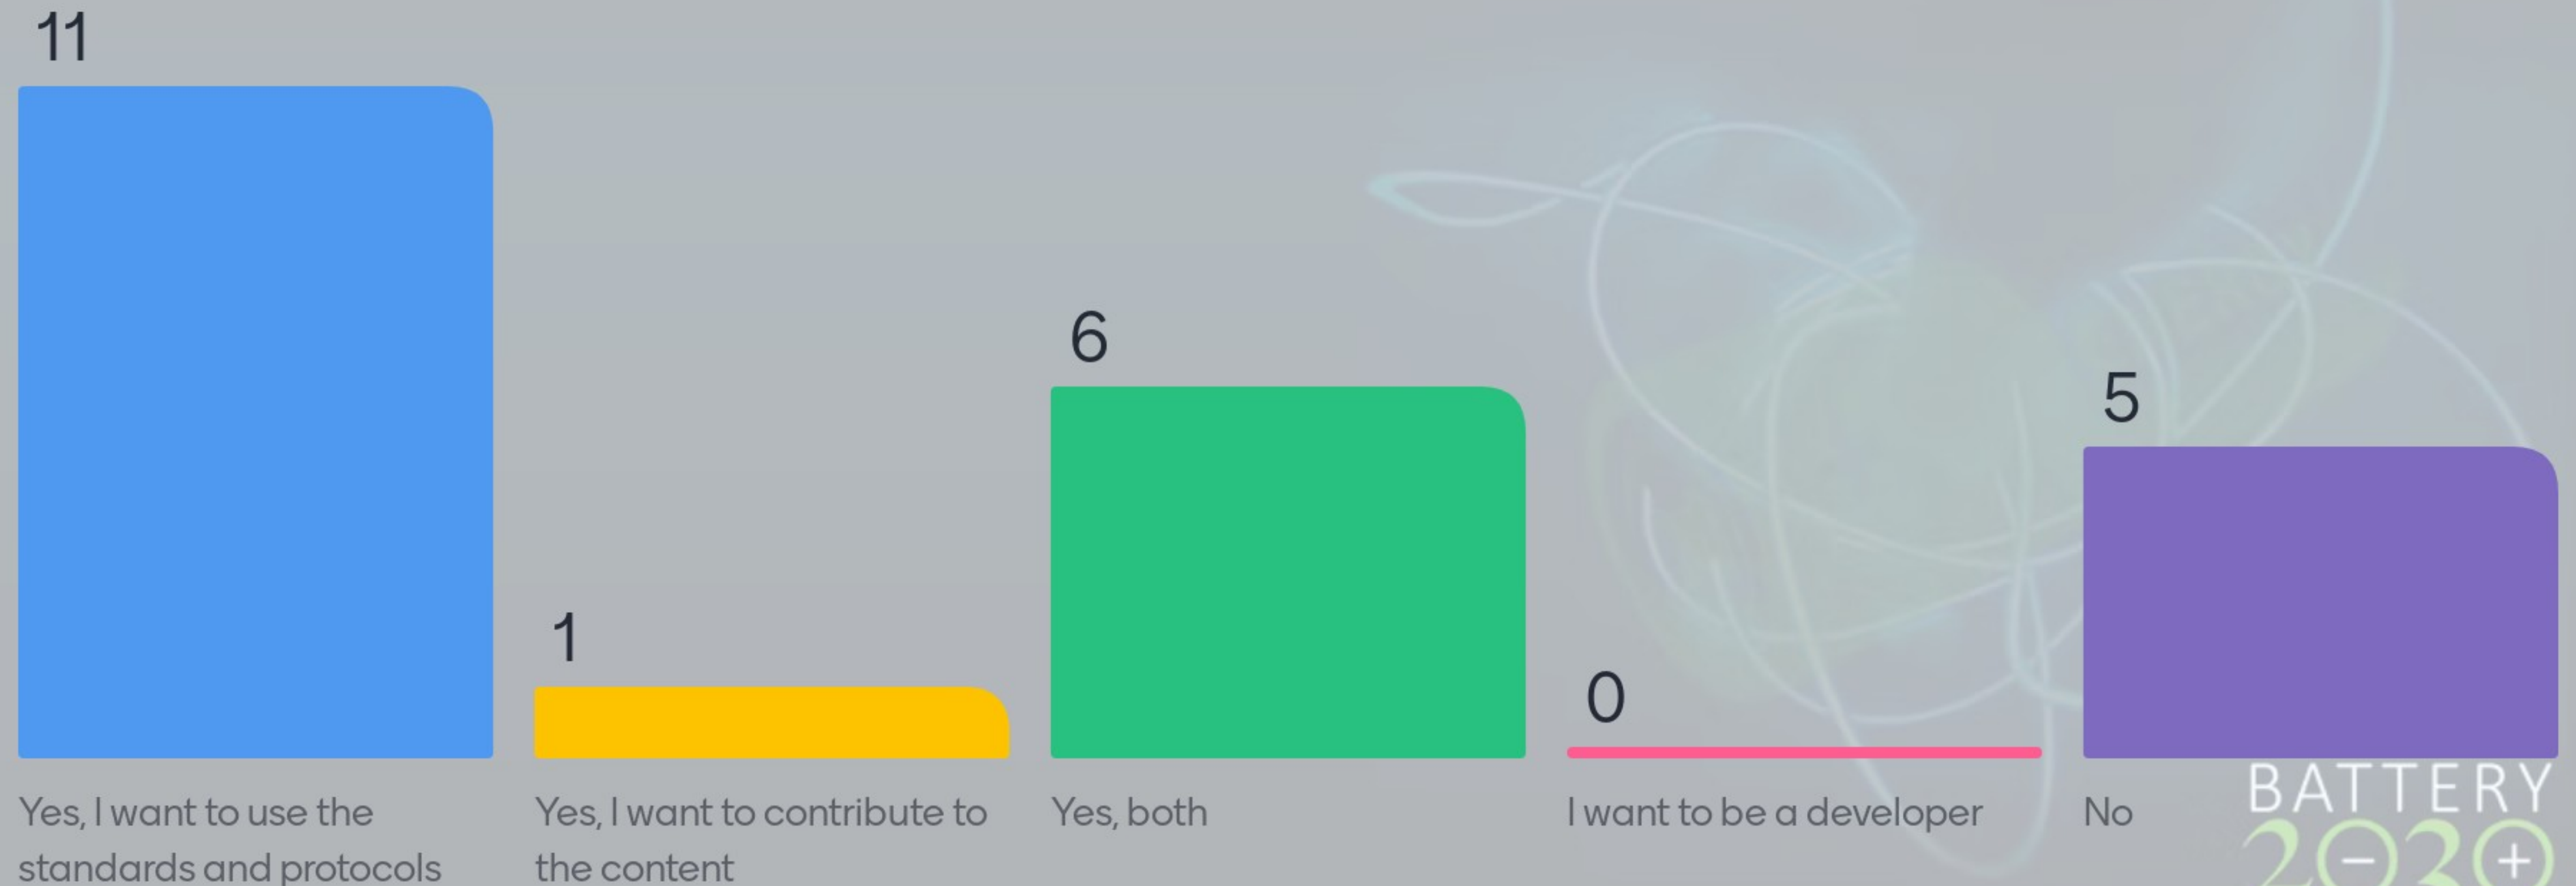

# Are you using an ontology in your work?

# Are you using an electronic lab notebook?

# Are you planning to use the Knowledge Base? (multiple answers possible)

# What are the SOPs used in your research project?

We have them, but documentation and sharing is lacking

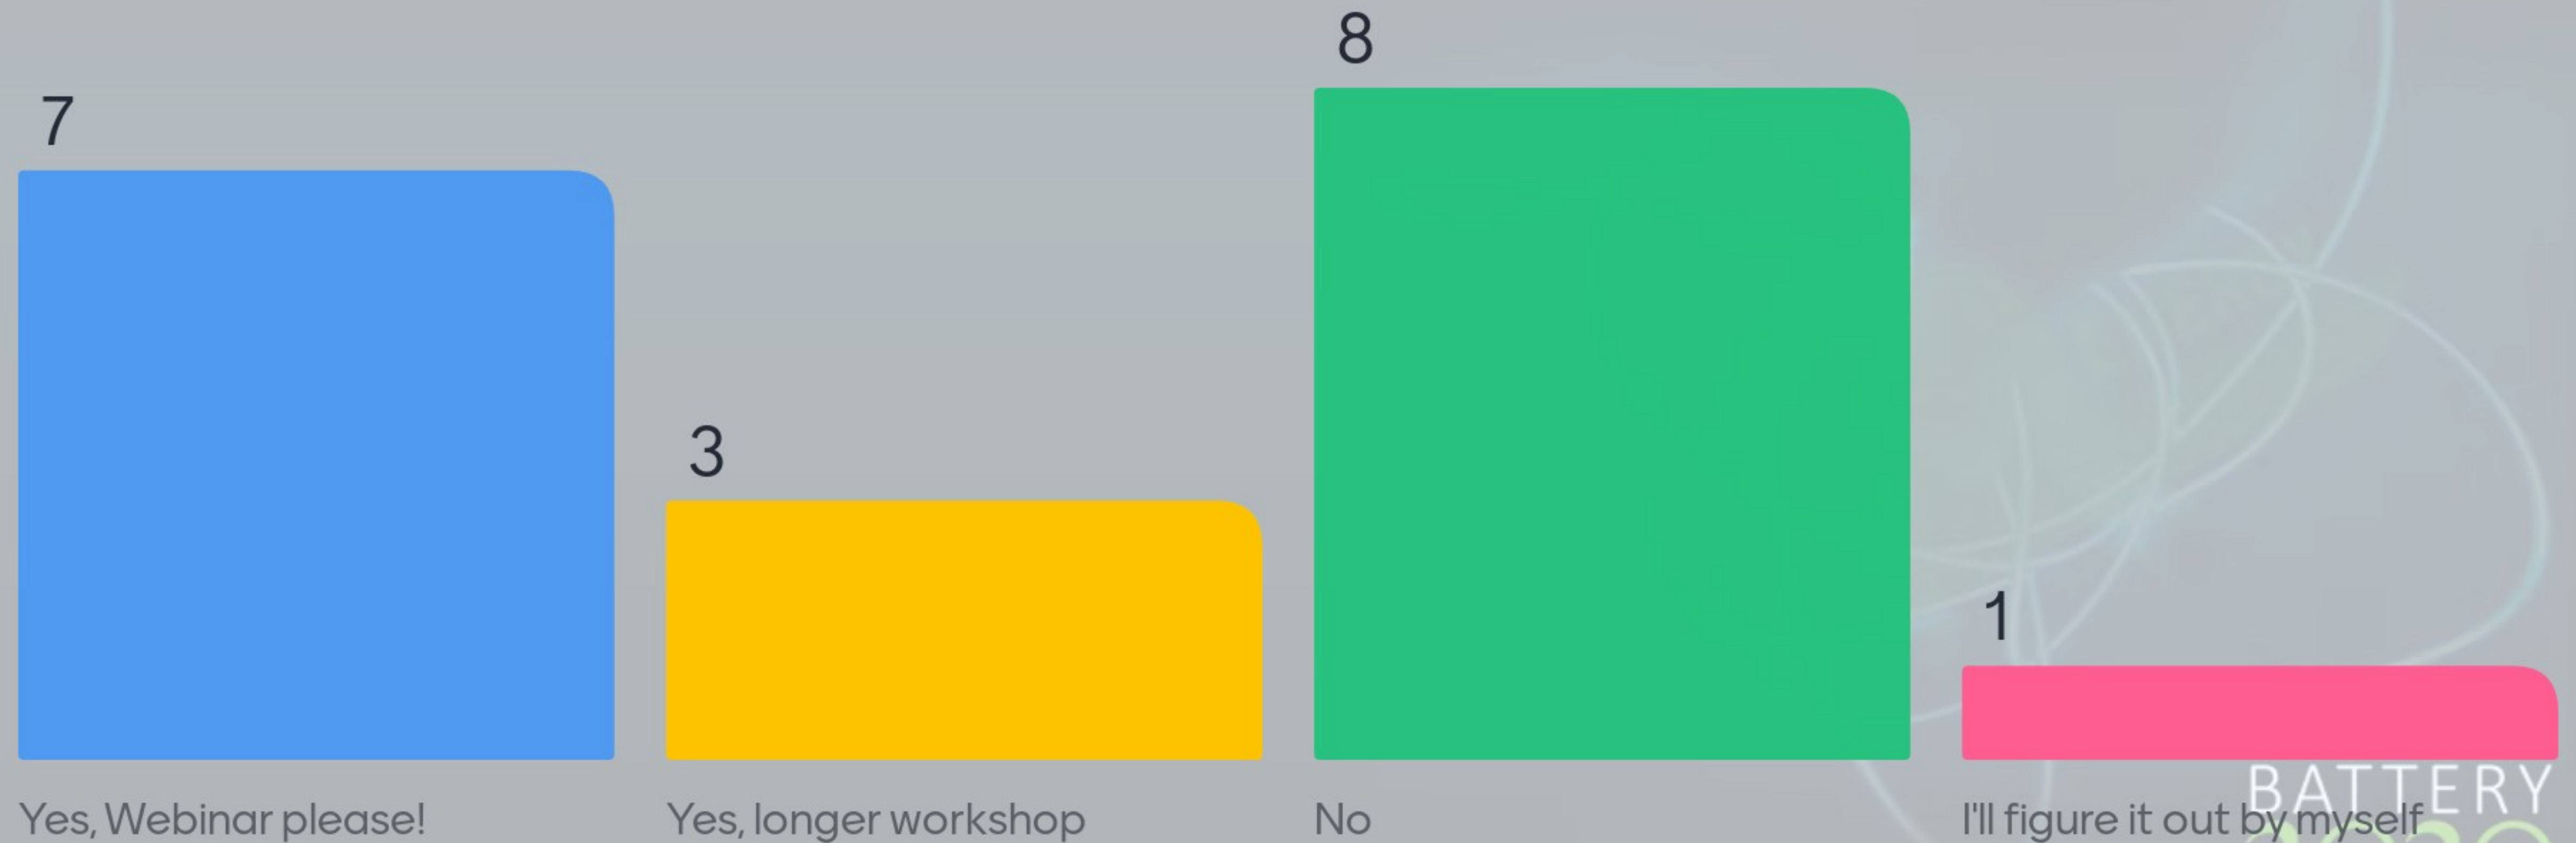

Cell parts cleaning

For Healingbat we have agreed which suppliers and test protocols/parameters to use between all the partners

jira work manangement system and sharepoint

Would like a place we can propose and discuss them in a community driven eay

# Are you interested in a Knowledge Base webinar/workshop for developers?

# What is missing for you in the Knowledge Base? What do you need to use it in my research?

Include modelling protocols too

A critical mass of articles/information. It's a good platform, but we need to populate it

To be discovered :)

A to-do list or task list, links to articles which need to be prioritized for creation or help.

Maybe add some labs that can perform the testing techniques? To promote collaboration

Showcase examples that are helpful and easy

Integration with large language models to research the contents in natural language

Showcase what an ideal quality article looks like
