

What are my expectations for the BATTERY 2030+ roadmap update in 2025 now after the first breakout session?

The new Roadmap should be a completely new document written from scratch

Define clear overall goals of the initiative.

the roadmap should focus on usp of europe

Importance of low TRL research

Shall we restructure the roadmap?

Define specific KPIs

Revise the short, the medium and the long term goals.

New streamlined roadmap.

What are my expectations for the BATTERY 2030+ roadmap update in 2025 now after the first breakout session?

Clear, concise, concrete that is understandable for normal readers.

importance of Industrial needs

New documents and low TRL for new science

Strong focus on LCSA (env, cost, social).

Clear definition of new goals

Referencing of other region's roadmaps

Build more links between relevant projects.

Ambitious goals for long term, realistic pathways to get there.

What are my expectations for the BATTERY 2030+ roadmap update in 2025 now after the first breakout session?

Keep the goals visionary and challenging!

Take into account the upstream processes; extraction and processing

Integration projects

Take into account upstream processes

Goals in line with EU battery industry

More clarity and precise goals

Sharper and more direct roadmap but keep the scientific challenges and attempt to be disruptive.

more defined KPIs that are realistic

What are my expectations for the BATTERY 2030+ roadmap update in 2025 now after the first breakout session?

Strong revision starting from what was achieved and what we learned

Propose specific amendments to the roadmap

To become a strong reference to pilot EC decisions

Even better communication with other initiatives. More KPIs to follow and prove progress.

Making Europe the top player for the two most important transformations, which are also inseparably linked

New topics related to new battery chemistries / technologies

The roadmap should be revised without excluding the KPIs from the closed projects.

Follow-up projects for upscaling the technologies

What are my expectations for the BATTERY 2030+ roadmap update in 2025 now after the first breakout session?

Generating impact outside EU is good but we should keep the best benefit within EU.

mark achieved goals in the state-of-the-art as an accomplishment
